

Chordal type thermocouple

Model : R980 series

Spec. sheet no. RD09-09

Service intended

Normally, Chordal type thermocouple is installed on the outer wall of the tube to measure the temperature, however, to measure the temperature more precisely and quickly, it is directly inserted into the boiler tube after generating a hole on the tube. Generally, the tube will be manufactured by the boiler maker, and the thermocouple will be inserted and calibrated by the manufacturer.

Application

- Boiler tube skin temperature
- Other various tube wall temperature measurement
