

## UFM 3030

Technical Datasheet

The universal 3-beam in-line ultrasonic flowmeter for liquids

- Independant of conductivity, viscosity, temperature, density and pressure
- No moving or intruding parts, therefore no pressure loss or wear
- Minimal operational and maintenance costs

KROHNE

## Standard solution in the process industry

UFM 3030 is a 3-beam ultrasonic flowmeter for liquids. UFM 3030 measures independent of conductivity, viscosity, temperature, density and pressure.

① Intelligent DSP software

② No moving parts

### Highlights

- Three beams generate a measurement effectively independent of flow profile
- Major performance improvement by applying innovative electronics and digital signal processing (DSP)
- Optional pressure and temperature inputs for calculation of standardised volumetric flow or mass flow according to API 2540 or customer specifics
- Over 20.000 ultrasonic flowmeters installed worldwide
- Easy to install and operate
- No moving or intruding parts, no wear, no drift, therefore no additional pressure loss
- No material build-up as unobstructed flow sensor with smooth surface finish
- No periodic re-calibration or maintenance
- Insensitive to corrosive or abrasive products
- Excellent long-term stability and reliability

### Industries

- Chemicals
- Petrochemicals
- Oil & Gas
- Heating, Ventilation & Air Conditioning (HVAC)
- Power Plants
- Water

### Applications

- Metering of cooling water and demineralised water
- Control of batching and blending operations
- Mass flow measurement
- Allocation measurement
- District heating
- Irrigation
- Energy measurement

## In-line Ultrasonic process flowmeter family

The UFM 3030 liquid process flowmeter consists of a UFS 3000 flow sensor and a flow converter, UFC 030. A UFS 3000 flow sensor can be build together with a UFC 030 flow converter as a compact flowmeter or can be installed separate as a field version.

**UFC 030 flow converter**

- ① The flowconverter is fully digital and fitted with a digital signal processor and advanced software for optimal performance
- ② For in-depth analysis of application and evaluation of flowmeter performance, the soundcheck interface and software is available

**Ultrasonic liquid flow sensor family**

- ① The UFS 3000, the universal ultrasonic flowsensor for liquids
- ② For extreme high or low temperature applications from -170 up to 500 deg. C, the UFS 500 HT/LT flowsensor is available
- ③ For open channels or onsite welding in of sensors the UFS 800 C [for open channels] or OPTISONIC 800 W (weld in) are available. Depending on the pipe size the UFS 800 W can be fitted with 1, 2 or even 3 sensor pairs for optimal measurement performance
- ④ For piping that can not be drained, the UFM 800 HT (hot tap) is available. The UFM 800 HT can be fitted in 1, 2 or 3 path configuration depending on the pipe size, while the pipe remains filled and pressurized

The OPTISONIC 7060 C is a process gasflowmeter with a wide application range that can be used under harsh conditions.

The OPTISONIC 7060 C consists of a flow sensor, OPTISONIC 7000 and a flow converter UFC 060. Standard the OPTISONIC 7000 is build together with a UFC 060 as a compact flowmeter

**OPTISONIC 7060 C process gas flowmeter**

- ① The OPTISONIC 7060 C: a robust flow sensor combined with the UFC 060 flow converter, with a digital signal processor for optimal performance
- ② The converter provides a range of diagnostics parameters. A software package is available for configuration, visualisation and analysis of diagnostics information

## Technical data

### Versions

UFM 3030 K (Compact version)	UFC 030 K ultrasonic flow converter directly mounted on the UFS 3000 ultrasonic flow sensor
UFM 3030 F (Separate version)	UFC 030 F ultrasonic flow converter is remotely mounted from the UFS 3000 ultrasonic flow sensor

### Performance

Measurement functionality	Actual volume with simple single stage batching function [standard] Corrected or standardized volume flow rate to API 2540 or customer specified [optional] Customer specified mass flow [requires customer data] [optional] Thermal energy measurement [optional]
Measuring range	v = 0 to 20 m/s [0 ft/s to 66 ft/s]
Measuring error [under reference conditions]	v = 0,5 to 20 m/s [1,5 to 60 ft/s]: < ± 0,5% of measured value v < 0,5 m/s [1,5 ft/s]: < ± 2,5 mm/s (± 0,1 inch/s) of measured value
Repeatability [under reference conditions]	± 0,2% of measured value
Process conditions	Maximum solid particle content < 5% [by volume] Maximum gas content < 2% [by volume]

### Communication

HART®	Standard
Profibus PA	Optional

## UFC 030 converter

General	The converter has a backlit local display with three push buttons. All operation can be done by push button or using a hand-held bar magnet, without opening the converter housing.
---------	---

## Applied materials

Converter housing	
- Die-cast aluminum	Standard
- Stainless steel 316 L (1.4404)	Option

## Finish

Standard paint, silver	Standard
Offshore paint system, silver	Option
	Other paints on request

## Protection category

IP 67 eq. NEMA 6	Standard
	to IEC 529

## Functionality

Continuous measurement of actual volume flow rate and actual volume total	Standard
HART® communication	Standard
Flow direction (forward or reverse)	Standard
Velocity of Sound (VOS)	Standard
Signal strength	Standard
Self diagnostics	Standard
Simple single stage batching	Standard
Corrected or standardized volume flow rate to API 2540 or customer specified	Option
Customer specified mass flow (requires customer data)	Option
Profibus PA	Option
Thermal energy measurement	Option

## Local display

Operation		With cover removed, all display operations incl. changing settings and parameters can be done using the push buttons. With cover in place the measured values and [error] messages can be viewed. Error resetting is still possible; in this case only with the help of an hand-held bar magnet.
3-field LCD		The converter has a backlit local display with 3 push buttons. 1st line 8 character 7 segment alphanumeric display and symbols for key acknowledgement 2nd line 10 character, 14 segment text display 3rd line 5 markers to identify display in measuring mode
Parameters	Standard	Actual volume flow rate in m3, barrels, liters, US gallons or user defined volume unit per hour, minute, second, or user defined time unit
	Standard	Actual volume total in m3, barrels, liters, US gallons or user defined volume unit (positive, negative, and sum totals), minimum 1 year overflow time
	Option	Velocity of sound in m/s or ft/s
	Option	Errors (flashing display and error code)
	Option	Signal strength (in dB)
	Standard	Corrected standard volume flow rate in m3, barrels, liters, US Gallons or user defined volume unit per hour, minute, second or user-defined time unit
	Option	Calculated mass flow rate in user defined mass unit

	Option	Corrected standard volume total in m <sup>3</sup> , barrels, liters, US Gallons or user defined corrected volume unit, minimum 1 year overflow time
	Option	Calculated mass total in user defined unit, minimum 1 year overflow time
	Option	Analog input in °C, °F, bar or psig
	Option	Thermal power
	Option	Thermal energy totalized
Languages		
- English	Standard	
- German	Standard	
- French	Standard	

**Galvanic isolation**

Standard	All inputs and outputs are galvanically isolated from the power supply, but not from each other
Optional	Namur NE 43, pulse/status outputs and analog 4-20 mA output fully galvanically separated

**Time-constant**

	0.025...99 seconds [programmable in increments of 0.01; 0.1 and 1.0 seconds]
--	--

**Low-flow cut-off**

cut-off active value	1...19%, programmable in increments of 1%
cut-off deactive value	2...20%

**Power supply**

Mains supply 100...240 V AC [48...63 Hz] +10% / -15%	Standard
Low voltage supply 24 V [AC or DC], AC: -10% / +15%, DC: 18...35 V	Option
Power consumption	10 VA / 10 W

**Cable connection**

M20 x 1.5	Standard	
1/2" NPT	Option	
PF 1/2"	Option	
		(for power supply and signal cables)

**Current output**

Function	Standard	Continuous measurement of actual volume flow rate	
	Standard	Flow direction indication (forward or reverse)	
	Standard	Velocity of Sound (VOS)	
	Standard	Transducer signal gain (dB)	
	Option	Corrected or standardized volume flow rate to API 2540 or customer specified	
	Option	Corrected or standardized volume flow rate to API 2540 or customer specified	
Settings		for Q = 0%	0...16 mA programmable in increments of 1 mA (Limit 20...22 mA)
		for Q=100%	4...20 mA
Connection		Active mode	using internal power supply 24 V DC, load ≤ 680 Ohm
		Passive mode	external voltage 18 ... 24 V DC, load ≤ 680 Ohm

**Pulse output**

Function		Pulse output
		Pulse per volumetric unit (m <sup>3</sup> , barrels, liters, US gallons or user defined volume unit per hour, minute, second or user defined time unit)

	Standard	Actual volume	
	Option	Corrected or standardized volume to API 2540 or customer specified	
	Option	Customer specified mass (requires customer specific density input)	
	Option	Thermal energy measurement	
		Frequency output	
		Pulse rate	
	Standard	Continuous measurement of actual volume flow rate	
	Standard	Velocity Of Sound (VOS)	
	Standard	Transducer signal gain (dB)	
	Standard	Pressure or temperature indication based on analog input [1] or [2]	
	Option	Corrected or standardized volume flow rate to API 2540 or customer specified	
	Option	Customer specified mass flow (requires customer specific density input)	
		Status output	
	Standard	Diagnostics alarm path errors, totalizer overrun, all errors, analog input	
	Standard	Flow direction indication (forward or reverse)	
	Standard	Batch volume reached	
	Standard	Alarm trip point (high and low) based on actual volume flow rate	
Settings		Pulse output	Pulse/unit (max. 2000 Hz) (example 1000 pulses/barrel) pulse duty cycle 25, 50, 100, 200, or 500 ms for frequency < 10 Hz
		Frequency output	0...2000 Hz (example Q0% - 0 Hz, Q100% - 1000 Hz) at 100% of scale value, max. frequency = 2 kHz
		Status output	On or Off
Connection		Pulse, frequency and status output	
		Active	Connection to electronic counters using internal power supply 24 V DC / I ≤ 50 mA
		Passive	Connection to electronic (EC) or electromechanical counters (EMC) external voltage 19...32 VDC / I ≤ 150 mA

**Analog input**

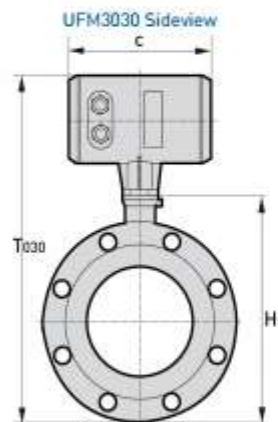

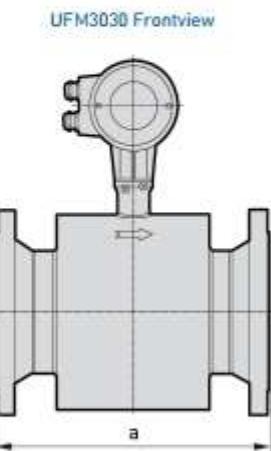

Function	Option	Corrected volume version: inputs to connect temperature and pressure signals for the corrected standard volume, acc. to API 2540, user defined volume or mass flow	
Setting	Standard	Input A1	For volume correction, unit: °Celsius or °Fahrenheit
			Temperature for 4...20 mA, max. temperature range -50...150°C (-58...302°F)
	Option	Input A2	For volume correction (pressure), unit bar or psi
			Pressure for 4...20 mA, max. pressure range 100 Bar (1450 psi)
Connection		Input A1	4...20 mA for temperature sensor
			Active (using UFC 030 24 V DC power) or passive, Load 58 Ohm
		Input A2	4...20 mA for pressure
			Active (using UFC 030 24 V DC power) or passive, Load 58 Ohm
	Option	Thermal energy measurement: inputs to connect two temperature sensors for measurement of temperature difference to calculate thermal energy	
Setting	Standard	Input A1	For heat measurement (temperature), unit: °C or °F
			Temperature for 4...20 mA, max. temperature range -50...150°C (-58...302°F)
	Standard	Input A2	For heat measurement (temperature), unit: °C or °F
			Temperature for 4...20 mA, max. temperature range -50...150°C (-58...302°F)
Connection		Input A1	4...20 mA for temperature sensor
			Active (using UFC 030 24 V DC power) or passive, Load 58 Ohm

		Input A2	4...20 mA for temperature
			Active (using UFC 030 24 V DC power) or passive, Load 58 Ohm

**Control input**

Function	Option	Reset totalizer	
	Option	Acknowledge errors	
	Option	Force outputs to zero	
	Option	Initiate batch (see operating instructions for description of this function)	
Setting		On or Off	
Connection		Input voltage (Uin)	Low: Uin < 5 V (off) High: Uin > 15 V (on) Max.: Uin = 32 V

## KROHNE Overview

- Electromagnetic flowmeters
- Variable area flowmeters
- Mass flowmeters
- Ultrasonic flowmeters
- Vortex flowmeters
- Flow controllers
- Level measuring instruments
- Pressure gauges
- Temperature measuring instruments
- Water solutions & analysis
- Oil and gas turnkey solutions

## Addresses:

### Germany

**Northern sales office**
